

DEPARTMENT OF PLACEMENT & REASONING ANALYTICS

NATIONAL INSTITUTE OF ADVANCED COMPETITIVE EXAMINATIONS

REASONING & APTITUDE COMPREHENSIVE ASSESSMENT - 2026

Course Code: APT-2026 | Total Questions: 50

Time Allowed: 2 Hours

Maximum Marks: 100

General Instructions:

1. Answer all 50 questions carefully.
 2. Each question carries 2 marks. Select the single best answer for each question.
 3. Confidential Document - Do not remove exam paper from the examination hall.
-

SECTION A: Logical Reasoning, Coding & Analytical Aptitude (50 Questions)

Q1. Statement: All students who attend the placement training practice aptitude regularly. Ravi attends the placement training. Which conclusion follows?

- A) Ravi will definitely get placed
- B) Ravi will score the highest marks
- C) Ravi practices aptitude regularly
- D) Ravi is the best student in the class [2 Marks]

Q2. Statement: The college increased training hours because students performed poorly in the aptitude test. What was the cause?

- A) Increased training hours
- B) College examination
- C) Poor performance in aptitude test
- D) Student attendance [2 Marks]

Q3. Statement: All students who submit assignments on time receive internal marks. Arun submitted his assignment on time. Conclusion:

- A) Arun will get full marks
- B) Arun will receive internal marks
- C) Arun will be absent
- D) Arun will not write the examination [2 Marks]

Q4. Statement: The road was closed because of heavy flooding. Which is the effect?

- A) Heavy flooding
- B) Rain
- C) Road closure
- D) Water [2 Marks]

Q5. Statement: Students are advised to carry an umbrella because rain is expected. What is the assumption?

- A) Students like umbrellas
- B) Umbrellas are expensive
- C) Students may get wet if it rains
- D) Students will not attend college [2 Marks]

Q6. Statement: All final-year students must attend the placement orientation programme. Which conclusion follows?

- A) Only selected students should attend
- B) Final-year students are required to attend
- C) First-year students must attend
- D) No student should attend [2 Marks]

Q7. Statement: The library extended its working hours during examinations. What is the most reasonable reason?

- A) Students stopped studying
- B) Students need more time to use library resources
- C) Teachers are absent
- D) Books are unavailable [2 Marks]

Q8. Statement: Ravi scored 85 marks because he practiced many questions. Which is the effect?

- A) Practice
- B) Questions
- C) 85 marks
- D) Examination [2 Marks]

Q9. Statement: If it rains heavily, the cricket match will be cancelled. It rained heavily. What can be concluded?

- A) The match definitely continued
- B) The match will be cancelled
- C) The players went home yesterday
- D) The match was played indoors [2 Marks]

Q10. Statement: All buses arriving after 9 AM are not allowed inside the campus. Bus A arrived at 9:30 AM.

Conclusion:

- A) Bus A entered the campus
- B) Bus A is not allowed inside the campus
- C) Bus A arrived before 9 AM
- D) Bus A was empty [2 Marks]

Q11. Statement: The students requested additional aptitude classes before the placement test. Which assumption is most reasonable?

- A) Students dislike aptitude
- B) Students need additional preparation
- C) The placement test was cancelled
- D) Students have completed all preparation [2 Marks]

Q12. Statement: The computer lab was closed because the computers were being repaired. What is the cause?

- A) Lab closure
- B) Computer repair
- C) Students
- D) Examination [2 Marks]

Q13. Statement: Regular exercise improves physical fitness. Ravi exercises regularly. Which conclusion is reasonable?

- A) Ravi will become an athlete
- B) Ravi may improve his physical fitness
- C) Ravi will never become tired
- D) Ravi will win a competition [2 Marks]

Q14. Statement: Students who do not submit the form cannot participate in the event. Kumar did not submit the form. Conclusion:

- A) Kumar definitely participated
- B) Kumar cannot participate in the event
- C) Kumar organised the event
- D) Kumar submitted another form [2 Marks]

Q15. Which is the strongest argument for conducting mock interviews?

- A) They reduce the number of students
- B) They provide practice for real interviews
- C) They replace technical interviews
- D) They guarantee placement [2 Marks]

Q16. Statement: The college arranged additional buses because many students were travelling home. What is the cause?

- A) Additional buses
- B) College closure
- C) Many students travelling home
- D) Bus drivers [2 Marks]

Q17. Statement: Every student who clears the aptitude round proceeds to the technical round. Priya cleared the aptitude round. Conclusion:

- A) Priya failed the technical round
- B) Priya proceeds to the technical round
- C) Priya skipped the aptitude round
- D) Priya is already placed [2 Marks]

Q18. Which of the following is an assumption? Statement: 'Use a helmet while riding a bike.'

- A) Helmets are fashionable
- B) A helmet can provide protection in an accident
- C) Bikes are expensive

D) Roads are always safe [2 Marks]

Q19. Statement: The college introduced a coding club after students requested more programming practice. Which conclusion is most reasonable?

- A) Students dislike programming
- B) Students wanted more programming practice
- C) Coding is no longer required
- D) The college cancelled programming classes [2 Marks]

Q20. Statement: All students who scored above 80% were selected for the next round. Ravi scored 85%. Conclusion:

- A) Ravi scored below 80%
- B) Ravi was selected for the next round
- C) Ravi did not attend the test
- D) Ravi failed the next round [2 Marks]

Q21. Statements: All engineers are graduates. Ravi is an engineer. Therefore:

- A) Ravi is a teacher
- B) Ravi is a student
- C) Ravi is a graduate
- D) Ravi is a doctor [2 Marks]

Q22. Statements: All laptops are computers. Some computers are expensive. Which conclusion definitely follows?

- A) All laptops are expensive
- B) Some laptops are expensive
- C) All laptops are computers
- D) No laptop is expensive [2 Marks]

Q23. Statements: Some students are programmers. All programmers are logical thinkers. Conclusion:

- A) All students are programmers
- B) Some students are logical thinkers
- C) No student is a programmer
- D) All logical thinkers are students [2 Marks]

Q24. Statements: No cats are dogs. Tom is a cat. Therefore:

- A) Tom is a dog
- B) Tom is not a dog
- C) Tom is both
- D) Cannot say [2 Marks]

Q25. Statements: All books are useful. Some books are novels. Which conclusion follows?

- A) All useful things are books
- B) Some novels are useful
- C) No novel is useful
- D) All novels are books [2 Marks]

Q26. Statements: All teachers are educated. Some educated people are writers. Which is definitely true?

- A) All teachers are writers
- B) Some teachers are writers
- C) All teachers are educated
- D) No teacher is educated [2 Marks]

Q27. Which relationship is correct?

- A) Dogs are outside Animals
- B) Dogs are a subset of Animals
- C) Animals are a subset of Dogs
- D) Dogs and Animals never overlap [2 Marks]

Q28. Which Venn relationship represents 'All roses are flowers'?

- A) Two separate circles
- B) Rose circle completely inside Flower circle
- C) Flower circle inside Rose circle
- D) Two overlapping circles with no complete inclusion [2 Marks]

Q29. Statements: Some cars are electric. All electric cars are vehicles. Conclusion:

- A) All cars are electric
- B) Some cars are vehicles

- C) No car is a vehicle
- D) All vehicles are electric cars [2 Marks]

Q30. Statements: All apples are fruits. All fruits are food. Therefore:

- A) All food is fruit
- B) All apples are food
- C) No apple is food
- D) Some food is not fruit [2 Marks]

Q31. Statements: No teachers are students. Ravi is a teacher. Therefore:

- A) Ravi is a student
- B) Ravi is not a student
- C) Ravi is both
- D) Ravi is a graduate [2 Marks]

Q32. Statements: Some programmers are gamers. Some gamers are athletes. Which statement is definitely true?

- A) All programmers are athletes
- B) Some programmers are gamers
- C) All athletes are programmers
- D) No gamer is a programmer [2 Marks]

Q33. If all A are B and all B are C, then:

- A) No A is C
- B) Some C are not A
- C) All A are C
- D) All C are A [2 Marks]

Q34. If no A is B, which statement is true?

- A) Every A is B
- B) A and B do not overlap
- C) Some A are B
- D) All B are A [2 Marks]

Q35. Statements: All doctors are professionals. Some doctors are teachers. Therefore:

- A) No doctor is a professional
- B) Some teachers are professionals
- C) All professionals are doctors
- D) No teacher is a doctor [2 Marks]

Q36. Which group is a subset of 'Vehicles'?

- A) Trees
- B) Books
- C) Cars
- D) Fruits [2 Marks]

Q37. Statements: Some engineers are managers. All managers are employees. Therefore:

- A) All engineers are employees
- B) Some engineers are employees
- C) No engineers are employees
- D) All employees are engineers [2 Marks]

Q38. All smartphones are electronic devices. Which statement is correct?

- A) All electronic devices are smartphones
- B) Every smartphone is an electronic device
- C) No smartphone is electronic
- D) Some smartphones are not devices [2 Marks]

Q39. No birds are mammals. Which statement is correct?

- A) All birds are mammals
- B) Birds and mammals are separate groups

- C) Some birds are mammals
- D) All mammals are birds [2 Marks]

Q40. Some students are athletes. What does this mean?

- A) Every student is an athlete
- B) No student is an athlete
- C) At least one student is an athlete
- D) Every athlete is a student [2 Marks]

Q41. If CAT is coded as DBU, how is DOG coded?

- A) DPH
- B) EPH
- C) EOG
- D) FPH [2 Marks]

Q42. If BOOK is coded as CPPL, how is PEN coded?

- A) ODM
- B) QFO
- C) PFM
- D) QEN [2 Marks]

Q43. If A = 1, B = 2, ..., Z = 26, what is the value of CAT?

- A) 22
- B) 24
- C) 25
- D) 26 [2 Marks]

Q44. If the letters of a word are shifted one position forward, what is the code for MANGO?

- A) LZMFN
- B) NBOHP
- C) NANGP
- D) MBOHP [2 Marks]

Q45. If PEN = 35 using P=16, E=5, N=14, what is CAT?

- A) 22
- B) 24
- C) 25
- D) 26 [2 Marks]

Q46. If + means $\times$ and $\times$ means +, find $4 + 3 \times 2$.

- A) 9
- B) 14
- C) 20
- D) 10 [2 Marks]

Q47. If $-$ means + and + means $-$, find $15 - 7$.

- A) 8
- B) 22
- C) 105
- D) 7 [2 Marks]

Q48. If @ means $\div$, then $20 @ 5 = ?$

- A) 100
- B) 4
- C) 15
- D) 25 [2 Marks]

Q49. If # means $\times$ and \$ means +, find $4 \# 3 \$ 2$.

- A) 10
- B) 14

C) 20

D) 24 [2 Marks]

Q50. Book : Read :: Food : ?

A) Cook

B) Eat

C) Drink

D) Buy [2 Marks]
